Change notice on 18650 cell surface printing information

2019. 03. 21

Change of print method of Lot information on the Cell

- LGC's cylindrical cell (for all cylindrical models) surface printing information/ shape will be changed as follows.

Detailed changes and purpose

<i>Items to be changed</i>	<i>Purpose</i>
(1) Including 2D barcode	<ul style="list-style-type: none">• To achieve better cell traceability of single cells by using the 2D barcode.
(2) Including Warning Text	<ul style="list-style-type: none">• To minimize end users' safety hazard and legal risks by misuse or abuse (using single cells for other purposes after disassembling cells from the system) of the final end-users.
(3) Cell printing code change	<ul style="list-style-type: none">• To align the Cell printing information with the international standard of cell model naming method.

Please see the next slides for example images and applying orders for each items.

Cut-in dates and example images

- The 3 types of changes will be applied to each cylindrical model one by one in order of each models' production schedules.

Estimated Cut-in date → around April 2019

Before					After				
LG Company	E Production site	B Capacity code	MH1 Traceable code	1865 Model size		INR IEC Code	18650 Model Size	MH1 Traceable code	
S Production Year	086 Production Day	C27 Lot no.	6 Production Line	N3 Serial No.	+ G Production Site	S Production Year	098 Production Day	D08 4 Lot no. Production Line	

This is an example image for reference. The 2D barcode, printing code and the warning text might not be located on the same side of a cell.

Note : The actual size and words on the Warning Text are subject to change with additional notice if necessary.

- Line remodeling construction for the change will be completed around April.
- **The exact Cut-in dates of each models and customers might NOT be the same, and will be updated soon.**
(in advance to the actual shipment)
→ Please contact your LGC sales account for the detailed Cut-in dates for each model.
